

WISDP/UNESCO

Sustainable Development Planning Workshop for Engineering Professionals are available in TQM!

TQM Consultants Co. Ltd is recognised as one of the professional training partner of WISDP.

Engineers play an essential role in attaining SDGs by creating the environmentally-friendly technologies of the futures as Sustainable development is one of the main issues analysed in the *Engineering: Issues, Challenges and Opportunities for Development* and is a major mandate of the UNESCO Engineering Initiative. Therefore, engineers in all disciplines should have good awareness of sustainability.

WISDP cooperates with TQM Consultants Co. LTD to hold the Sustainable Development Planning Workshop for Engineering Professionals. It features the detailed information about each of the 17 SDGs and the latest sustainable development movement around the world. Learners would be able to understand the sustainability-related challenges and opportunities that businesses are currently confronted with and explore different levels of change that their organizations can apply to achieve their sustainability goals.

For whom it may interest, don't hesitate! Join us and apply now!
